DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, 28 and 29, drawn to a telescoping camera crane, classified in class 396, subclass 428.
 - II. Claims 25 and 26, drawn to a hydraulic actuator, classified in class 92, subclass 88.
 - III. Claim 27, drawn to a four way hydraulic valve, classified in class 137, subclass 595.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a camera crane that does not include invention III, and invention III has separate utility such as in a camera crane that does not include invention II. See MPEP § 806.05(d).
3. Inventions I and II or inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination

Art Unit: 2851

as claimed because the camera crane does not require the particular details of invention II or III.

The subcombination has separate utility such as for an antenna positioning device.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
